NOTE.

In accordance with the recommendation of the Departmental Committee on Trade Records, Imports are throughout the Tables in this Volume credited to the countries from which they were consigned to the United Kingdom, and Exports to the countries of final destination so far as known. The Tables thus correspond to those which have been given in the Supplements to the Annual Statements for the years 1904 to 1908, and differ from those given in Volumes I. and II. of preceding issues of the Annual Statement up to 1908 in the case of certain important countries, notably Germany, the Netherlands, and Belgium, while the trade between the United Kingdom and countries without a seaboard (see note on p. v.) is separately stated, instead of being included with that of the countries in which are situated the ports through which it passed in transit (see p. v.).

The Annual Statement of Trade is divided into three Volumes.

VOLUME II. will contain

Abstract and Detailed Tables of Imports from and Exports to each country, and the quantities (where recorded) and value of principal and other articles retained in the United Kingdom;

Abstract and Detailed Tables of Imports and Exports at each Port;

The amount of Customs Revenue received at each Port or Place;

Details of the Transhipments under Bond of certain articles;

An account of the quantities of Articles liable to Customs Duties remaining in Bond; and

Details of the Transhipments of Free Goods on through Bills of Lading.

VOLUME III. will contain

A classification on the basis followed in Volumes I. and II. of the Annual Statement for 1908 and earlier years.

INTRODUCTION TO VOLUME I.

All Tables given in this Volume cover the five years 1908 to 1912. The **Summary Tables,** pp. 1 to 9, show the total value of the imports and exports of the principal articles, classified in groups under the four main heads of:—

I. Food, Drink and Tobacco.
II. Raw Materials and Articles Mainly Unmanufactured.
III. Articles Wholly or Mainly Manufactured.
IV. Miscellaneous and Unclassified.

Imports from and exports to British Possessions are distinguished from those from and to Foreign Countries, and exports are divided, as in all the Tables of the Annual Statement, into, "Produce and Manufactures of the United Kingdom" and "Foreign and Colonial Merchandise." These Tables are followed by a Statement showing what articles are included in each group.

The **Abstract Tables,** pp. 20, 21, and 22 to 71, show first (Tables 4 to 10) the total value of imports and of exports as a whole, and, second (Tables 11 to 13) the total imports and exports of each article, in alphabetical order. Certain articles are recorded by value only, but in most cases the quantities also are given.

Detailed Tables.—Table 14 shows in alphabetical order* imports of articles not subject to duty consigned from the principal and other countries; Table 15 gives the same information for Dutiable Articles, and Table 16 shows the quantity of each dutiable article entered for home consumption, the rate of duty, and the gross amount of duty received. The countries from which dutiable goods delivered for consumption were consigned are not in general shown, but Tea is divided into British East Indian, Ceylon, China, and other Tea, and in the case of Wine entered for consumption there is a statement of the quantity consigned from each principal country. Tables 17 to 19 show in alphabetical order the exports to the principal and other countries of articles (a) of the produce and manufacture of the United Kingdom (b) of Foreign and Colonial merchandise. Tables 20 and 21 show the imports and exports of Gold and Silver Bullion and Coin from and to the principal and other countries.

The Tables relating to imports include only goods actually unloaded from the importing ship. Goods unloaded and afterwards re-exported are included, even though imported on through Bill of Lading, unless they are removed under bond from the importing to the exporting ships at the same or another port, when they are omitted from the general tables of imports and exports. A separate account is kept of such "transhipments under bond," and particulars with regard to them are given in Vol. II of the Annual Statement. A separate account of the Free goods that are entered in transit and are imported and exported on through Bill of Lading, which are included in the general Tables, will also be found in the same Volume. Bullion and Coin are excluded from all general Tables of imports and exports, and are shown separately, as stated above, in Abstract Tables 9 and 10, and in Detailed Tables 20 and 21.

The following classes of goods arriving in this country are not included in the import statistics:—

(1) Personal luggage, including parcels brought by passengers for private use, so long as such parcels do not contain dutiable goods. Dutiable goods contained in passengers' parcels are included in the statistics.
(2) Fresh fish and shell fish of British taking, landed from British ships arriving direct from the fishing grounds.
(3) Ships' Stores, Military and Naval Stores on board Government Vessels, bunker coal and ballast of no commercial value.
(4) Mats, sacks, cases, etc., used as the packages of imported goods.
(5) Goods directly imported by Ambassadors and Ministers accredited to this Kingdom.
(6) Old Vessels bought from foreign or Colonial owners.
New Vessels, including barges, boats and small craft, have been included under a separate heading since 1903, prior to which year they were included as iron or steel manufactures, if of iron or steel, and as wood manufactures or manufactured goods unenumerated, if of wood.

Such diamonds and other precious stones as are declared to the Customs on importation have been included in the statistics, but the great bulk of diamonds and other precious stones imported is not so declared, and the quantity included in the Tables therefore represents only a small fraction of the actual imports. Some particulars of the diamonds sent from South Africa to the United Kingdom are given in a footnote on page 33.

The following classes of goods are not included in the Export Statistics:—

(1) Personal luggage and effects.
(2) Ships' Stores, Military and Naval Stores on board Government Vessels, goods exported by H.M. Government, and ballast of no commercial value.
(3) Mats, sacks, cases, &c., used as the packages of exported goods.
(4) Old Vessels sold to foreign or Colonial owners.

The record of precious stones exported is incomplete for the reason given above with regard to imports.

* In some cases articles are grouped under a general heading, *e.g.*, wheat and other cereals are classed under Corn, and pig iron under Metals.

Bunker coal taken for use on board ships engaged in the foreign trade is not included in the general tables of exports, but the total quantity shipped is given on p. 43.

"Special" Imports and "Special" Exports.—By the term "Special Imports" is meant all imports of Foreign and Colonial produce and manufactures which are used or consumed in the United Kingdom, or worked up in the United Kingdom into articles for export, as distinguished from imports of Foreign and Colonial merchandise which are afterwards exported without change of form.

Although there are no means of ascertaining at the time of importation whether goods are imported for consumption or for re-export, and the special imports of any one year cannot thus be exactly stated, it is clear that these special imports are represented approximately by the difference between the "Imports" and the "Exports of Foreign and Colonial Merchandise" during the year. Volume II. of the Annual Statement will contain a table showing the result of this calculation applied to each principal article imported from each country, and will give (*a*) the value and (where recorded) quantity of the consignments received (*b*) the value and quantity after deduction of the re-exports of each principal article during the year. The latter figures, which may be briefly described as values and quantities retained in the United Kingdom, will therefore represent approximately the Special Imports of each principal commodity.

In the case of dutiable articles the special imports are more exactly represented by the quantities entered for home consumption, which are given in Table 16 of the present volume.

By the term "Special Exports," is meant the exports of the produce of the United Kingdom, and of all goods manufactured in the United Kingdom whether from home or foreign produce, as distinguished from Foreign and Colonial merchandise exported in the same form in which it was imported, such exports of Foreign and Colonial merchandise are commonly known as "re-exports." The distinction is observed in all tables relating to exports. Under produce and manufacture of the United Kingdom are included new ships and boats, built in the United Kingdom and sold to foreign or Colonial owners, if not registered as British, or so registered only for purposes of delivery or transfer abroad. Exports of Foreign and Colonial Merchandise include not only goods in transit through the United Kingdom (unless transhipped under bond, as explained above) but also all goods which have not had their value sensibly modified by any process of refining or manufacture, although they may have remained for some time in the United Kingdom. Thus goods which have been merely sorted, repacked, or blended, are treated as Foreign or Colonial, but goods which have undergone any other process are included under the head of Exports of the Produce or Manufacture of the United Kingdom, as are also all goods exported by Parcel Post.

Countries to which Imports and Exports are credited.—Throughout the Tables in this Volume *Imports* are classified as received from the countries whence they were consigned to the United Kingdom, not, as in the corresponding volumes for 1908 and earlier years, as received from the countries whence they were shipped direct to the United Kingdom. In this respect the figures are on the lines of those published in the supplementary Volumes of the Annual Statement of the Trade of the United Kingdom prior to 1909.

The substitution of countries of consignment for countries of shipment affects not only the imports from countries which have no seaboard,* and which are separately distinguished in the Tables of this Volume, but also imports shipped to the United Kingdom from a country other than that possessing a seaboard or not from which the goods were consigned. The recorded imports from such countries as Belgium, the Netherlands and Germany are largely affected by this change of practice.

The countries whence goods are consigned are not in all cases the countries of actual origin since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to the United Kingdom. In such a case the second country would be the country of consignment, to which the goods would be credited in these Tables.

Exports are credited in the Tables to the country of "final destination," *i.e.* the country to which they are consigned, whether that country possesses a seaboard or not. As in the case of imports, this classification differs from that adopted in the corresponding volumes for 1908 and earlier years, the countries affected being those without a seaboard*, which previously did not appear in the Tables at all, and those through which goods consigned to those countries were shipped, and to which such goods were formerly credited in the Tables.

A Supplement to the Annual Statement of Trade for 1912 will be issued, in which a classification of the Trade on the basis followed in Volumes I. and II. of the Annual Statements for 1908 and earlier years will be furnished, for the purpose of comparison with the Tables for previous years.

Method of Ascertaining Quantities and Values of Imports and Exports.—The statements of both quantities and values are based on the declarations of importers and exporters as subsequently checked by the Customs officials. Quantities are not recorded in every case, but where recorded they are generally recorded by weight. Liquids are, however, in general, entered by bulk, as are also timber, onions, and certain seeds; a few articles are entered by number only; floorcloth, linoleum, etc., by square yards; piece goods, for the most part, by linear yards. Spirits are entered by proof gallons, *i.e.*, by the number of gallons of proof spirit they contain. Where goods are entered by weight the quantities given represent the net weight exclusive of packages, sacks, casks tins, bottles, etc., in which they may be contained, or of reels, etc., on which they may be wound.

* The following is a list of such Countries:—Switzerland, Abyssinia, Afghanistan, Bolivia, Rhodesia, Bechuanaland Protectorate, Basutoland, Orange Free State, Transvaal, Swaziland, Uganda Protectorate.

In the case of *Imports* the values given are intended to represent their cost, plus insurance and freight to the place of landing, or when consigned for sale the latest sale value of the goods. In the case of dutiable articles the values are given exclusive of the amount of the duty. In the case of *Exports* the values are intended to represent the cost of the goods including all charges thereon up to the time of their delivery on board ship. In other words, the values of imports are given "c.i.f." and the values of exports "f.o.b."

In the Tables of Imports and Exports of Gold and Silver Bullion and Coin the value of British Gold and Silver Coin is the face or currency value. The value of Foreign Gold and Silver Coin given is that of the commodity, and not necessarily the face or currency value.

Parcel Post, and Unenumerated Goods.—Imports by Parcel Post, when not subject to duty, are not classified according to their nature, but are separately recorded at the end of the Tables relating to imports, and are entered by number of parcels and value. Dutiable goods imported by Parcel Post are grouped, according to their nature, with similar goods imported in the ordinary course. Exports by Parcel Post are treated in the same way as imports of free goods by Parcel Post. All such exports are treated as being of the Produce and Manufacture of the United Kingdom.

Unenumerated goods are divided into "Unmanufactured" and "Manufactured," and are placed in the Tables of imports and exports after all other goods recorded alphabetically and before Parcel Post. They are entered by value only. Statements showing the total value of the principal articles included under each of these heads which were imported and exported (both British and Foreign) in 1912 only, and without distinction of countries of import or export, are given on pages 39, 53, and 71.

An index of Articles, showing references to Imports and Exports, and the Home Consumption of dutiable goods, is given at the end of the volume.

ABSTRACT TABLES.

NOTE.

The Accounts of Imports and Exports are exclusive of Foreign Merchandise Transhipped under Bond at Ports in the United Kingdom (shown in Vol. II.).

The values of the Imports represent the cost, insurance, and freight; or, when goods are consigned for sale, the latest sale value of such goods.

The values of the Exports represent the cost, and the charges of delivering the goods on board the Ship, and are known as the "free on board" values.
